

We can not outlaw possession of the tool which is designed for fair use as well as we can not outlaw kitchen knives only because they can be used as a weapon. I've heard about a mysterious murder; it took a lot of efforts to prove that the victim was suffocated with a PILLOW - should we outlaw pillows? We should rather prosecute UNFAIR USE of those tools. We can not punish legitimate Americans by depriving them of tools of their choice only because SOMEBODY uses them unfairly. We need right to decide what tool and what software we use. Banning free software is beneficial only for monopolies; it is anticompetitive; we, the people, do not need this!
